25X1

3. (Secret - GLC) Dave Brandwein, FMSAC, called to pass on a report he had received from Dave Williamson of NASA. During a briefing given the full House Science and Astronautics Committee by NASA, Chairman Miller mentioned that the Soviet space program was having some problems. Miller then mentioned in very general terms sensitive information given him by Brandwein in a private briefing. While this is on the Committee record, it is our collective judgment that Miller's remarks were not sufficiently serious to warrant an attempt to expunge them from the executive transcript. Williamson also expressed some [REDACTED] the members of this Committee. See Memo for the Record. STATOTHR
